GENERAL DIRECTIONS TO OUR PATRONS

SEEDS BY MAIL

IMPORTANT NOTE—The weight limits in the 1st, 2nd and 3rd zones have been increased to 70 pounds; in other zones the limit is now 50 pounds

Parcels Post— Since the installation of the new parcels post law seeds, bulbs, tools, plants and garden supplies (excepting poisons and liquids) may be sent by mail to all parts of the United States, including Alaska, Canal Zone, Guam, Hawaii, Porto Rico and the Philippines. Packages are subject to a limit of maximum weight in the first and second and third zone of 70 pounds; in all other zones of 50 pounds. The maximum size of a package is 84 inches for length and largeness of the girth combined.

Zone Rates— May be had by applying to your postmaster, who will tell you which zone you are in with reference to Los Angeles or upon application we will tell you if you supply us with the name of your postoffice.

For Parcels Weighing 8 Ounces or Less, containing seeds, bulbs or books only, the rate of postage to all zones is 1½ cents for 2 ounces or fraction. (Over 8 ounces the parcels post rates apply.).

On shipments weighing 20 pounds or more beyond the 2d postal zone it is cheaper to ship seeds by express. As the express companies give a receipt for each package, it amounts practically to insurance without cost, whereas it costs extra, according to value, to insure a parcel post package. We guarantee the safe arrival in the U. S. of all seeds shipped by express or insured parcel post.

To foreign countries the parcel post rate is 14 cents per lb. Registration where possible is 10 cents. C.O.D. orders can now be sent to Mexico.

FREE DELIVERY

FOR CERTAIN QUANTITIES OF SEEDS

We Deliver Free in the United States and Possessions, and Mexico, by **Parcel Post** or **Express** to any express office at our option all **vegetable and Flower Seeds** by the **Packet, Ounce and ¼ Pound**, and **up to and including ten pounds**. **All other articles, including bulbs, are quoted f. o. b. Los Angeles** and postage **must be added as per table at the right where goods are desired by parcel post.**

Purchasers pay transit charges on larger quantities of seeds, and other merchandise, unless otherwise provided.

Please Order Early, thus enabling us to forward promptly. It will hasten forwarding materially, if customers will kindly make up orders alphabetically, as the goods are listed that way in the catalogue. Seeds are also put in compartments in our stores alphabetically, hence an order can be filled more quickly if it is made out in that manner.

Counter Customers— We suggest to those who purchase in person at our store the advantage of having their lists made out before they call. They may be left and called for later, taken at once, or shipped. In any case it is a great saving of time to the purchaser. The list should have full name and address written on it so that our catalogues may be mailed to the purchaser as issued. We also urge early purchases.

Error in the Filling of Orders— We use the greatest care in filling, checking and packing orders. Yet should anything be omitted we will promptly forward when advised. Keep a duplicate copy of your order for comparison.

Remittances may be made by Express Money Order, P. O. Money Order or Bank Draft; if stamps or cash send in a Registered Letter. We must decline sending goods C. O. D. unless 25 per cent. of their value accompanies the order.

Accounts— Parties having no account with us— who order goods without remittance— must furnish satisfactory reference.

NON-WARRANTY

The Germain Seed and Plant Company gives no warranty, expressed or implied, as to description, quality, productiveness, or any other matter of seeds, bulbs, plants or trees they send out, and they will not be responsible in any way for the crop. If the purchaser does not accept the goods on these terms they are at once to be returned.

Testimonials from Customers— We are always pleased to hear from our customers regarding the results of their gardens. Photographs of gardens and particularly of vegetables and flowers, are thankfully received by us.

Questions and Correspondence— We endeavor to answer promptly all letters of inquiry— **which should be on separate paper from orders**— but we cannot undertake the planning of entire gardens and grounds.

FALL PLANTING---SPRING FLOWERING BULBS

Imported Dutch Bulbs have long played an important part in the American garden. It is by sheer worth and genuine merit that the Hyacinth, the Tulip and Daffodil have maintained themselves in a class apart. Inexpensive, easily grown and of surpassing beauty, they appear in full bloom long before their sleepy rivals awaken to the touch of Spring. It is well worth the small outlay to bring the joy of these spring flowers to your home.

The following pages contain a selection of the best that Holland can produce. We offer all the finest standard varieties and many deserving novelties which will delight the amateur.

The treatment of bulbs is so simple that anyone can grow them by following the brief directions given in this catalogue. Other prominent spring and summer flowering bulbs such as Lillies, Gladiolus, Freesias, Iris, etc., also may be planted at this time and are listed and described in the succeeding pages.

We have further included a number of flower and vegetable seeds—all to be planted during fall and winter. Sweet Peas, Stocks, Winter Marigolds, Pansies, etc., from early plantings, bloom abundantly in winter, while nothing is more delicious than a winter crop of vegetables from your own garden.

TULIP

For a gorgeous display of color in a Spring Garden, the tulip has no equal. No flower offers a greater variety in vivid color combinations, exquisite shades and delicately blended tints, combined with a rare perfection of form which makes it altogether irreproachable.

Culture—Tulips prefer light soil; a rich sandy loam may not always be available but the addition of a liberal amount of sand and rotted manure or good fertilizer will produce wonderful results where soils are heavy. They should be planted four inches deep and five or six inches apart, or they may be scattered in the perennial border and allowed to become naturalized. A slightly shaded position will lengthen the blooming season.

When grown in pots or pans, which is easily done, they may be planted quite close together and about two inches deep, bearing in mind that a light, rich soil is equally important here.

DARWIN TULIPS

Too much cannot be said in praise of this class of tulips; they are tall vigorous growers, producing large flowers of perfect form and most brilliant in color. For planting in groups in the shrubby or perennial border, they are unsurpassed. As a cut flower, they are of great value and may be successfully grown in pots, especially if kept cool and allowed to come along naturally.

TULIP DARWIN TYPE

BREEDER TULIPS

These fine Old Dutch or Breeder Tulips have become very prominent in the last two or three years and fortunately they do exceptionally well in our Southern California climate. They may be used in connection with the Darwin strain as they are similar in habit and appearance. The Breeders are rich in shades of bronze, terra-cotta, orange-brown, old gold, etc., colors which are entirely lacking in the Darwin group. By using both it is possible to improve and extend considerably the color range in tulips and add to your garden many artistic tones which modern taste in gardening seems to require.

We are offering this season a full collection of this remarkable group, including several novelties.

	Ea.	Doz.	100
Bronze King. Large bronzy yellow..	\$0.10	\$1.00	\$7.50
Bronze Queen. Bronze buff, tinged apricot10	1.00	7.50

SIX NEW AND SELECT DARWINS

We have selected the following six superb sorts from the most recent introductions in Darwin Tulips. They are heralded as possessing to a high degree all the qualities for which the Darwin tulips are famous. An ideal collection for the up-to-date garden.

	Ea.	Doz.	100
Centenaire. Rich rosy-pink, large and sturdy	\$0.15	\$1.50	\$10.00
Faust. Deepest purple-violet, enormous flower.....	.15	1.50	10.00
Melicette. Lavender, inside flushed violet, unusual and beautiful shade	.15	1.50	10.00
Prince of The Netherlands. Deep cerise-rose shading to rose-pink. A splendid variety, large, strong and exceptionally bright in color.....	.15	1.50	10.00
Professor Rauwenhof. Bright cherry red shaded salmon, strong grower. Brilliant and very effective.....	.15	1.50	10.00
Roi d'Islande. Deep rose with violet sheen. A unique and beautiful flower15	1.50	10.00

Collection of two each of the six sorts \$1.50

NEW HYBRID TULIPS (Darwin X Cottage Garden)

The following novelties are the result of crosses between the Darwin and cottage garden strains. They were raised by Krelage & Son and other noted specialists and have aroused much interest in recent European exhibits, obtaining many awards. They are the latest in Dutch bulbs and amateurs everywhere will observe them with keen delight.

Ea. Doz. 100

Amber. (Award of Merit R.H.S.). Round flower of unique coloring; terra-cotta shaded amber, base yellow and blue.....\$0.20 \$2.00 \$14.00

Argo. (Certificate, Haarlem). Yellow, mottled red and passing off to bronze salmon......25 2.50 17.50

Idyl. (Award of Merit N.H.B.S.) Vivid rose shaded salmon, pure yellow base with blue edge......20 2.00 14.00

Marvel. (Award of Merit H.B.G.S.) Inside of old gold, outside salmon rose, edged yellow. This variety is not only very beautiful but also distinctly sweet scented......35 3.50 25.00

Triton. (Award of Merit H.B.G.S. & N.H.B.S.) Elongated flower of most dazzling carmine, base pure yellow with light blue edge......25 2.50 17.50

Collection of two each of the five sorts\$2.20

MAY-FLOWERING OR COTTAGE GARDEN TULIPS

May-flowering tulips differ from Darwin tulips in the shape of the flowers, which are either oval or pointed, many being also reflexed. They blossom even later than the Darwins and among them every known shade is to be found.

Ea. Doz. 100

Bouton D'or or Golden Beauty. Pure golden yellow (2 for 15 cents)....\$0.08 \$0.80 \$6.00

Elegance. Dark crimson, petals beautifully reflexed......08 .80 6.00

Gesneriana Major (Spathulata). True, rich crimson scarlet with blue black center08 .80 6.00

Grenadier. Brilliant orange......08 .80 6.00

Inglescombe Pink. Delicate rose pink, tinted salmon08 .80 6.00

John Ruskin. Salmon rose, edged lemon yellow08 .80 6.00

La Candeur. Silvery white......08 .80 6.00

Mrs. Moon. Large rich yellow, blooms long and pointed; reflexed. A splendid flower08 .80 6.00

Parisian Yellow. Clear yellow......08 .80 6.00

Picotee (Maiden's Blush). White, margined carmine rose, greatly admired and popular......08 .80 6.00

Shandon Bells. (Isabella or Blushing Bride.) Color, primrose flushed rose, changing to rosy red......08 .80 6.00

Mixed. A high grade mixture containing all colors known in tulips, suitable for bedding and border planting06 .60 4.50

ODD OLD DUTCH TULIPS

Ea. Doz. 100

Bizarres. A very old tall growing race; the flowers are all striped and feathered brown or maroon on yellow ground\$0.10 \$1.00 \$7.00

Bybloemen. Striped and feathered rose and violet......10 1.00 7.00

Rembrandt Tulips. Delicate shades with stripes and flames of darker colors. Beautiful combinations... .15 1.50 10.00

Parrot Tulips. These do not grow tall like the foregoing, unfortunately, but they are always popular. The flowers are fringed, corrugated and curiously twisted and oddly variegated in color......10 .75 5.50

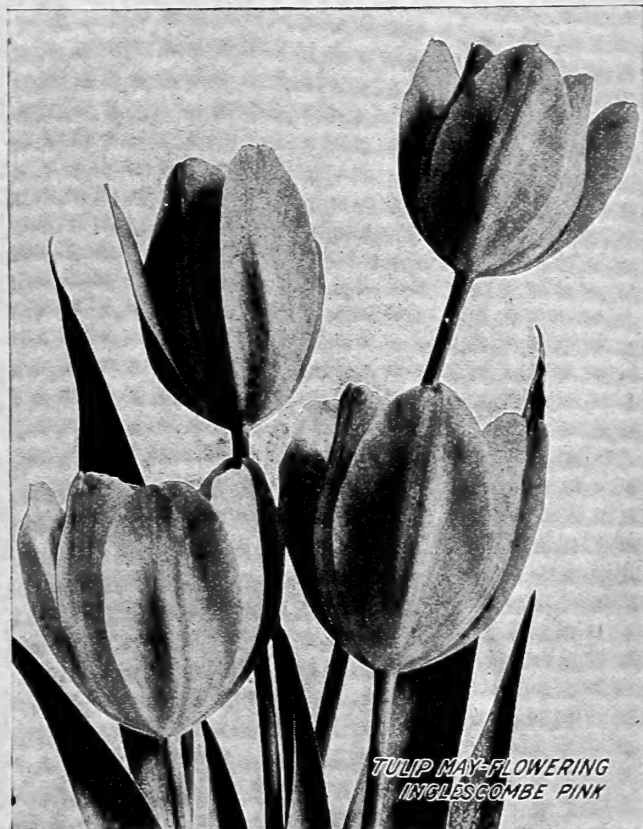

Collection. Three each of the above four kinds.....\$1.00

DOUBLE TULIPS

The double tulips belong to the early flowering class. They are excellent for pot culture, especially in jardinières with bulb fibre. In the garden they succeed best in shaded locations and last well when cut.

Ea. Doz. 100

Mixed colors\$0.10 \$0.75 \$5.50

TULIP MAY-FLOWERING
INGLESKOMBE PINK

NARCISSUS OR DAFFODIL

The Narcissus is one of the most useful of the early blooming bulbs, being hardy and of easy culture.

Culture—Plant from October to January, covering the bulbs from 5 to 8 inches. They will thrive in any good garden soil. If this can be enriched with some well rotted manure or bone meal, so much the better, but do not dig in fresh manure. Plant six inches apart.

They are valuable for pot culture and indoor decoration. Grown in bulb fibre any dish or jardiniere will do as no drainage is necessary. Simply keep the fibre moist at all times, but never sodden.

SINGLE LARGE TRUMPET VARIETIES

	Ea.	Doz.	100
Emperor. Brilliant yellow trumpet, perianth deep primrose yellow. Flowers very large, splendid garden variety and beautiful cut flower	\$0.20	\$2.00	\$14.00
Empress. A magnificent variety, perianth white, of great substance, trumpet rich yellow, one of the best20	2.00	14.00

HYACINTH

To simply mention the Hyacinth brings to mind a picture of Spring—certainly we cannot think of Spring without the Hyacinth, it is so eminently the flower of Spring.

Culture—The bulbs may be planted in the open from October to January in any good garden soil which has been well spaded up. They should be six or eight inches apart and covered from four to six inches.

Pot Culture—Plant one bulb in a five-inch pot. A six-inch pot will hold three or four. Use light soil and place a few crocks in bottom of pots for drainage. The top of the bulb should be about even with the surface of the soil. Keep in a cool dark place for five or six weeks until the roots are fully developed, then gradually inure to the light.

In Glasses. Fill the glass with water so as to barely touch the base of the bulb. A piece of charcoal the size of a walnut, put into the water, will keep it pure and obviate frequent changing. Keep in a dark cool place until the roots have fairly started, then remove to the light.

In Bulb Fibre. Bulb fibre may be used to great advantage when growing bulbs for home decoration. As no drainage is necessary, any receptacle can be used to plant them in and there is no danger of water running on furniture or floors.

GERMAIN'S EXHIBITION HYACINTHS

	Ea.	Doz.	100
General de Wet. Very fine light rose, a pink form of the popular lavender blue variety "Grand Maitre".	\$0.25	\$2.75	\$21.00
Gertrude. Carmine rose, large spike, a compact grower of a deep rose color, sometimes described as light red	.25	2.75	21.00
Lady Derby. Bright rose pink, an excellent variety for pot culture, producing a remarkably fine large spike	.25	2.75	21.00
La Victoire. Bright glistening deep carmine red, an excellent exhibition variety.	.25	2.75	21.00
Roi des Belges. Deep red	.25	2.75	21.00
Moreno. Bright pink, large bells; an improved form of Norma. The large spikes produce bells in greater number and of a brighter shade of pink.	.25	2.75	21.00
La Grandesse. Pure white, splendid spike	.25	2.75	21.00
L'Innocence. Pure white extra large truss. The best all-round white hyacinth for all purposes, forces well and is equally good for bedding	.25	2.75	21.00
Grand Maitre. Deep porcelain blue	.25	2.75	21.00
Duke of Westminster. Dark purple bells with white eye	.25	2.75	21.00

CROCUS

Crocus require very little attention and they are one of the first flowers to bloom in the Spring. Planted in masses or 3 or 4 rows arranged in a border, they are very effective. They must not be planted more than one inch deep as if planted too deeply they sometimes fail to bloom. Crocus are often planted in the lawn where they come up very early in the Spring and are practically over blooming before the lawn needs much mowing. This method is more popular in the east and if tried here it had best be done where there is some shade. They are ornamental when flowered in pots.

CROCUS

ANEMONE

AGAPANTHUS

Umbellatus

Ea. Doz.

Blue African Lily. Bearing clusters of bright blue flowers on stout stalks, similar to the Amaryllis in appearance and culture. A valuable specimen for tub or pot culture. Planted in the Fall they will bloom in July and August.....

\$0.35 \$3.50

ANEMONE

One of the most showy and beautiful flowers; of neat and compact growth, with elegantly cut foliage and the most brilliantly colored blossoms. It requires but little attention. For best effect, plant in masses.

Culture—Anemones require a rich, loamy soil. Soak the roots in water for six hours previous to planting. This causes them to swell and enables one to distinguish the crown, which is readily discernible by the fibrous points at the top of the root, the bottom being quite smooth. A sunny place is best. Place a slight ridge around the bed so that the plants may be flooded with water.

Plant any time from October to May. They bloom from February to July.

Ea. Doz. 100

Choice Mixed.....

\$0.10 \$0.75 \$5.50

AMARYLLIS

Bella Donna—"Bella Donna Lily," blush, delicately shaded with pink or light purple, flowering before the leaves appear, very fragrant and fine for cut flowers, lasting fully a week when cut. Plant in a sunny position, leaving the neck even with the surface of the soil.

Ea. Doz.

First Size.....

\$0.25 \$2.50

Second Size.....

.15 1.50

Amaryllis Vittata—American Hybrids. Our strain of American hybrid Amaryllis is unsurpassed. The flowers average over 8 inches in diameter and range in color from almost pure white, through rose, carmine, cherry red, scarlet and crimson, to deep maroon. Many are striped and mottled. The flowers are flat and spreading, with full rounded and overlapping petals. The amaryllis are of easy culture and may be planted in the open in this section. In colder sections plant them in pots. Selected bulbs which will bloom in first season ..

.75 7.50

BEGONIA

Tuberous Rooted

This splendid class of begonias is perhaps the handsomest of all bedding plants for a shady or semi-shaded location. Bulbs may be started in pots early in February or in the open later in the Spring. They prefer a rich sandy loam, and should be covered to a depth of two or three inches. Ready about February 1st.

CALLA LILY

Known to every lover of flowers. It is one of the most beautiful blooms, and cannot be too highly recommended. Culture—Callas are very easy to grow, and to be successful they need only be given a good rich soil and an abundance of water. May be planted either in a sunny or half shady place. The white variety may be planted from July to March, and will bloom all year excepting during June, July and August. The yellow variety is ready in December and should be planted shortly afterwards.

GLADIOLUS

(Sword Lily)

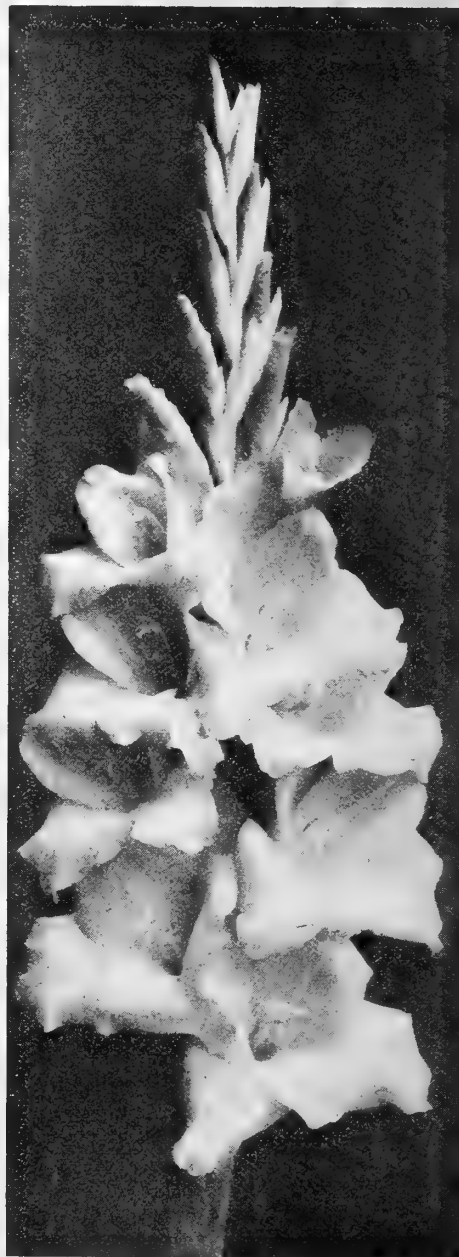

The gladiolus is invaluable as a summer flower, and its popularity has increased tremendously in the last few years. Our list contains only the best sorts, varieties which have been tried and proven to give the most satisfactory results both as cut flowers and for garden display. When cutting, do so as soon as one or two flowers are expanded. The rest of the buds will open in water if care is taken to remove faded flowers, changing water daily and cutting a piece off the stem each time.

Culture—The bulbs should be planted from three to five inches deep in any good light or sandy garden soil. They flourish best in an open sunny situation.

Gladiolus bulbs ready in November.

PANCRATIUM

(Spider Lily)

Ea. Doz.

Carribeum. Strange and beautiful flower. Pure white and sweetly scented\$0.25 \$2.50

LILIUM

We cannot say too much in praise of this elegant class of plants, which are becoming more popular every year. It does not seem necessary to attempt an improvement on that which is already perfect, as the lily is. Nature has endowed the lily with every element of grace and beauty, not only in outline but in color; happy blending of colors, form most varied and beautiful, fragrance delightful; in short all the characters essential to real beauty.

Culture—In open ground; dig well, add some sand and well rotted manure (except for Auratum, which will not bear manure) and plant about five inches deep.

L. Giganteum (Easter Lily). Ready about November; other varieties about the middle of December. They bloom as follows:

Giganteum in April and May; other varieties in July and August.

Ea. Doz.

Auratum. "Golden Banded Lily," the finest and most magnificent of the genus. Flowers white, spotted crimson with a distinct golden stripe running through each petal. \$0.35 \$3.50

MONTBRETIA

Mentbretia Crocosmiaeflora. Long spikes of showy, orange-colower flowers, with purple, brilliant and showy **\$0.10 \$0.75 \$5.50**

RANUNCULUS

(Fair Maids of France)

These beauties from the fair Land of France have become the most popular flowers to be found in the display window of all Los Angeles flower shops during their blooming season.

The flowers of our selected strain are double with a graceful fullness suggestive of a full-bloom rose. They keep fresher and longer when cut than any other flower we know. The colors are surprisingly bright and cheerful, appearing in many shades of rose, red, salmon, yellow, maroon and white. The picture on the cover of this catalogue gives some idea of their graceful form, but it is not possible to portray here their extraordinary brilliancy and variety of coloring.

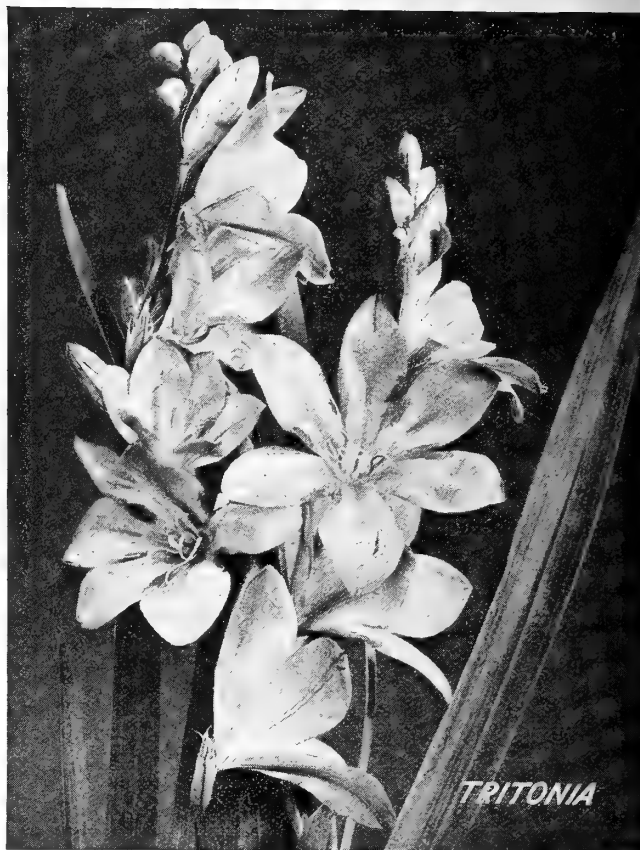

Soak the roots in water for two hours before planting and cover with two inches of soil. They should be planted rather closely for the best garden display, 4 to 6 inches being an average distance apart.

Very effective for massing or borders, flowering in great profusion during spring and summer; also suitable for pot culture, a few bulbs potted in the fall will give a fine display during the winter.

Ea. Doz.

Alba. Pure white..... \$0.10 \$0.75

Rosea. Rose pink..... .10 1.00

PREPARED BULB FIBRE

Germain's prepared fibre is becoming more popular every season. It is far more convenient than potting soil when planting bulbs indoors, and replaces to advantage the pebbles used in growing Chinese lilies, etc., in bowls as it contains plant food which stimulates the plant and improves the blossoms.

No drainage is needed, consequently any receptacle may be used and bulbs will bloom splendidly in a jardiniere, lily bowl, or dish having no perforation whatever in the base. This eliminates any danger of water and soil running through on furniture, floors, or carpets. The material is clean and free from any odor.

Plant bulbs as you would in soil but do not press the fibre too firmly, nor fill the bowl too full. Keep moist but not too wet or sodden. Start the bulbs in a dark, cool place and bring to the light when sprouted an inch or so. Hyacinths, Narcissus, Chinese Lilies, Tulips, Freesias, Crocus, etc., are grown to perfection in this way.

Price: Packet (enough for 6 or 7 inch bowl) 15s; per lb. 25c.

FLOWER SEEDS

Many of the varieties listed in this catalogue, such as winter flowering Sweet Peas, Stocks, Calendulas, Pansies, etc., bloom during the winter months if planted early in the fall, all will make much stronger plants and flower more abundantly when wintered over.

A complete list of flower seeds, descriptions and directions for planting will be found in our general catalogue issued January 1st each year.

Abbreviations used: A, Annual; N, Biennial; P, Perennial; B, useful for bouquets or cut flowers.

MIGNONETTE

PANSY or HEARTSEASE

CULTURE—To have pansies in perfection, sowings should be made every month from the end of July to the end of April. Young, vigorous stock always gives the best results. Sow in pans or frames and transplant when large enough to a border of rich soil. Water must be given freely in bright weather and the flowers gathered as soon as they begin to wilt in order to keep up a succession and prevent running to seed, which injures the plants and tends to small flowers.

GERMAIN'S GIANT PRIZE PANSIES

What could be more interesting to any lover of flowers than a bed of Pansies fresh with the morning dew, some clad in their rich velvety petals and others turning their smiling faces upward asking only to be appreciated in their brief effort to make the world a little more beautiful.

	Pkt.		Pkt.
GIANT PURPLE. Very showy.		GERMAIN'S SUPERB GIANT

Double. Mixed. Height 2 ft. ¼ oz. .55.15

HOW TO GROW SWEET PEAS

Sweet peas are deep rooting. The soil where they are to be planted should be dug to a depth of eighteen inches. They are also gross feeders and a liberal amount of fertilizer will insure luxuriant growth and large flowers. Dig the fertilizer well under and see that the soil has settled and is firm before the seeds are planted. This result can be quickly obtained by tramping and watering. The seeds are usually sown in shallow trenches about three inches deep and covered only one or 1½ inches. The balance of the earth is filled in after the young plants have grown a few inches. In certain heavy soils it is best not to cover the seed more than one inch at any time. Seeds may be spaced one or two inches apart in the trench and the young plants gradually thinned to six inches to prevent crowding.

A support for the vines must be provided early. They require a liberal amount of water. The flowers must be gathered often and should any seed pods form, these must be immediately removed to insure a prolonged blooming period.

In growing sweet peas out of season, the vines are protected with cheese cloth or other light material. If the cloth is stretched above the plants it provides sufficient protection against strong sunshine in summer and occasional low temperatures in winter.

GERMAIN'S NEW WINTER SWEET PEA

"SUPERIOR PINK" is the highest achievement of our foremost Sweet Pea specialists. It created a sensation at the Seedsmen's Convention at Del Monte this spring. We highly recommend it with the conviction that it is the largest, strongest and most beautiful pink sweet pea we ever have had the privilege to offer.

GERMAIN'S NEW WINTER SWEET PEA

"Superior Pink"

SUPERIOR PINK. The supreme rose-pink. Three pkts. for \$1.00.....	\$0.35
SWEET LAVENDER. True lavender is an immensely popular shade in sweet peas, and our new "Sweet Lavender" will easily surpass any other variety in the lavender group. "Sweet Lavender" is a pure lavender of enormous size, beautifully frilled and always bearing fours on good long stems. Three pkts. for \$1.00.....	.35
MRS. KERR. This unique sweet pea has given universal satisfaction. It is unquestionably the best early salmon.....	.25
ELDORADO. Splendid glowing orange. Early, free flowering and of robust growth. Eldorado has shown greater resistance to sunburn than any orange variety previously introduced. In the winter garden it is simply a blaze of color.....	.25

GERMAIN'S FOUR FOREMOST WINTER SWEET PEAS

The four varieties above described have been selected for excellence as well as novelty. They are indeed the four foremost winter flowering sweet peas of the season. One packet each of Germain's Four Foremost Winter Sweet Peas.....

XERANTHEMUM. A. Very attractive double flowers of medium size which are easily dried. Many shades of red, rose and white mixed.	.10

The H. C. Baker home on Arden Road Pasadena

The accompanying photographs show a few Southern California homes that have been treated with Nuvida Fertilizer.

A well kept lawn, rich green in color, adds hundreds of dollars to the value of your home.

Lawn Pamphlet Free

The H. G. Wylie home 17 Chester Place L. A.

We carry a complete line of grass seeds of all kinds. The common varieties are listed below.

KENTUCKY BLUE GRASS—Premium Grade—is the finest grade of Blue Grass on the market. Grown from specially selected strains and in carefully selected fields, the seed gives the greatest satisfaction, due to its quality, purity and freedom from other seed. Per lb. 70c; 10 lbs. \$6.50, postpaid.

WHITE CLOVER. Our seed is strictly first-class, absolutely clean and pure and of the highest quality. Per lb. 90c; 10 lbs. \$8.00, postpaid.

KENTUCKY BLUE GRASS and WHITE CLOVER MIXED. This favorite lawn mixture is made of Premium Grade Seeds mixed in the right proportion. Per lb. 80c; 10 lbs. \$7.50, postpaid.

AUSTRALIAN, OR PERENNIAL RYE GRASS. An extremely hardy sort, requiring less fertile soil and withstanding more hardships. Used extensively in Arizona and becoming very popular in Southern California. Per lb. 35c; 10 lbs. \$3.00, postpaid.

The verdict of all who have used the Nuvida Lawn and Garden Fertilizer is that it is the most complete and satisfactory Lawn Dressing ever placed on the market. It is manufactured by us and we guarantee that it contains all the elements required and in the proper proportions to produce a luxuriant growth. It is a clean, odorless material and can be applied without offending one's sense of smell or sight. Being quick in action the effect can be noticed within a very short time by the rich green coloring and that velvety appearance so much sought after. Its superiority over stable manure can scarcely be estimated, as the latter, in addition to disfiguring the lawn by its unsightly appearance, also gives out an unpleasant odor, and always contains weeds and other undesirable seeds.

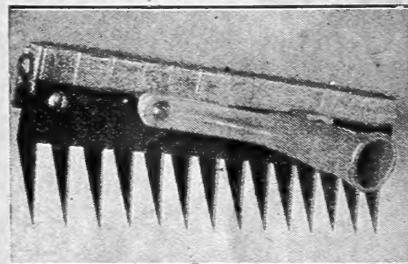

Trial bag for 300 square feet, 10 lbs.	\$0.60
25 lb. sacks for 750 square feet.	1.25
50 lb. sacks for 1000 square feet.	2.25
100 lb. sacks for 3000 square feet.	4.00

Write for Nuvida Pamphlet

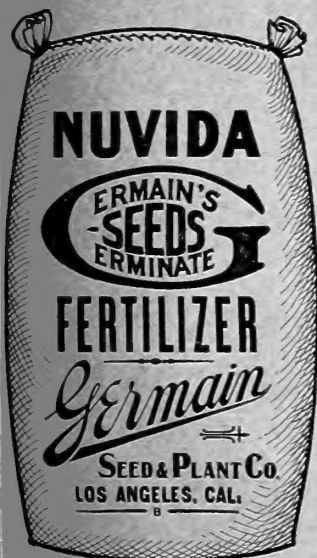

NUVIDA FLOWER AND FERN FERTILIZER

It is of a concentrated nature requiring but very small doses to the plant and will undoubtedly yield good results. We confidently feel assured of its success, because of its purity, its food value, and its proportions of fertilizer elements. Nuvida Flower and Fern Fertilizer, 35 cents per can.

The Everlasting Flowers Will [19] Brighten the Dullest Day

This tool is all machine made, with all working parts detachable, and the metal of each part selected for its particular use. The angle of the teeth, and its weight, keep it in the ground in the heaviest lawn. The sharp blades cut the grass in sections and the cross cutter bar completes the work. A lawn raked and cross raked is free of all runners and the work has left a perfect seed bed to sow clover or grass seed. Brown Bermuda lawns can be skinned in the fall with this tool with a fraction of the labor necessary by any other method. Many lawns burn out in spots because the heavy soil has become impervious. Occasional use of the Bermuda Rake will so loosen the soil it will again take water. Price each \$5.00.

VEGETABLE SEED LIST

There are a number of vegetables that can be planted in the fall. We recommend the following varieties knowing that you will obtain excellent results if the seed is planted and cared for.

For descriptions, planting instructions and complete list of Vegetable Seeds, see our general catalogue. A pamphlet giving cultural directions for any of the varieties listed may be had on application.

All prices listed are postpaid.

BUSH ROSES

MISS LOLITA ARMOUR

We believe this rose to be one of the greatest breaks by way of color ever known in Roses. There is nothing we know of in cultivation like it. Regardless of color, we doubt if there are any more beautiful. The color is difficult of description, but may be briefly described as follows: Chrome yellow at the base, shading to burnt orange and copper. The reflex of the petals is chrome yellow at the base, shading to bright salmon with brilliant copper suffusion. Each.....\$1.00

THE WONDERFUL PRIZE WINNING ROSE "LOS ANGELES"

It is a Rose without a fault. It is strong in growth, sending out enormous canes clothed with dark, handsome foliage. The foliage is mildew proof. It is hardy, deliciously fragrant and during the spring, summer and autumn months produces an endless succession of ravishingly beautiful blossoms. The buds are long and pointed and expand to a flower of glorious size. Its color is of transcendent beauty, being an indescribable tone of flame pink, with superb golden yellow shadings at the base of the petals. The color combinations in the open flower possess a fire and intensity not found in any other Rose. Our stock for the present season is limited. Extra strong plants, each.....\$1.00

MAD. EDOUARD HERRIOTT

The famous Daily Mail Rose. Winner of the \$5,000 prize at the International Horticultural Exposition held in London, England. Buds coral red shade with yellow at base. Open flowers of medium size, when fully expanded they take on a superb coral red color with yellow shadings. As the flower ages it passes to bright, rosy scarlet and shrump red. Each.....\$1.60

SOUVENIR DE CLAUDIUS PERNET. Flower of most striking sunflower yellow color, deeper in the center, without any other blending; very large and full, beautifully formed, with elongated deep petals; long pointed bud of exquisite shape, carried on long, stiff stem. The color of the flower keeps absolutely without fading, even in the warmest days. A most vigorous grower of erect branching habit; beautiful brilliant green foliage; few thorns. The new ever-blooming real yellow Rose.....\$1.50

SOUVENIR DE GEORGES PERNET. Flower of beautiful Orient red color, the end of petals cochineal carmine, shaded with yellow, very large, full and globular, oval bud carried on erect stem. A vigorous grower of branching habit, with few long thorns and bronze green foliage. This wonderful variety will be a precious addition to the Pernetiana class, being very vigorous and absolutely hardy. An abundant bloomer.....\$1.50

GOLDEN EMBLEM. Flower similar in color to "Constance" and having the same crimson stripe on outer petals, with high pointed center; tea perfume. Growth free and branching with splendid constitution, deep glossy green foliage, stout stalks and mildew-proof; extra perpetual flowering. One of the best yellow roses grown.....\$1.50

MRS. S. K. RINDGE. A rich chrome yellow in color. Long pointed buds, petals are stained with cadmium red. Fragrant and a good keeper. As the flowers open they are suffused with soft pink, foliage is large, leathery, and a glossy light green.....\$1.00

ROSE MARIE. Amongst the various Roses which we have had under trial there are but few more meritorious than this magnificent American novelty. The buds are long and pointed, the petals large and well-rounded, and the open bloom ideal as to form. The color is a delightful shade of pure rose pink. Highly recommended.....\$0.85

WM. F. DREER ROSE. The flowers, which are similar in shape to Los Angeles, and like that variety, beautiful in all stages of development, are at their best in the half-expanded flower. These, in expanding, are of a soft, silvery shell-pink, the base of the petals of a rich golden-yellow, which, at certain stages of development, gives a golden suffusion to the entire flower.....\$1.00

COLUMBIA. A rose which is popular with all cut flower buyers throughout America. In color a delightful shade of rose pink. In outdoor planting the bushes attain a moderate height and blossom freely through a long season.....\$0.75

MAMAN COCHET. Deep rose-pink, inner side of petals silvery rose; very double. Extra strong grower; fine bloomer. One of the finest Roses by far that has yet been introduced.....\$0.60

RADIANCE. A Rose of American origin and to our mind one of the best varieties in cultivation today. Buds long and pointed, expanding to blooms of enormous size. Similar in shape to Caroline Testout, but in color deep rich rose pink.....\$0.75

RED RADIANCE. A sport from the well known pink form. Flowers equal in size, but of a deep, rosy red color. Buds and open flowers of mammoth proportions. Deliciously fragrant; a constant and free bloomer. An ideal Rose for cut flower purposes... .75

CLIMBING ROSES

CLIMBING HOOSIER BEAUTY. A new rose. The climbing form of the popular and well known bush variety. Dark velvety red.....1.00

AMERICAN PILLAR. Color a rich rosy carmine with a glint of white in the center. Stamens a rich golden yellow. The flowers are large, single and borne in immense clusters......60

CLIMBING GEN. McARTHUR (New). Destined to be fully as popular as its parent. A beautiful climbing red rose.....1.00

CLIMBING GRUS AN TEPLITZ. A perfect sheet of crimson when in bloom. It is the same as the bush Teplitz......75

CLIMBING PAPA GONTIER. A climbing sport of Papa Gontier. Color, rich red; a beauty.....1.60

ORNAMENTAL SHRUBS

BUDDLEIA (or Butterfly Bush). A comparatively new variety from China with long spikes of delicately colored lilac flowers. These are produced throughout the greater portion of the year. A plant of loose-growing, graceful effect.....\$0.75

CRATAEGUS LALANDI (Fire Thorn). Highly recommended. A splendid, free growing shrub that bears in fall great masses of orange-red berries......75

C. CRENULATA. Brighter in the berries than the last named; a magnificent shrub......75

COPROSMA BAURI. This shrub has the most glossy-green foliage of anything we know and it is especially well suited for seaside places, as it thrives most wonderfully under the influence of salt sea breezes, when so many of our best shrubs fail. We recommend it very highly......60

HYDRANGEA. One of the most popular shrubs in existence and grown practically all over the world. Produces immense trusses of pink flowers. By the addition of iron to the soil in which they are growing the flower will take on a pale blue cast......60

EUONYMUS JAPONICUS. A free growing, useful evergreen shrub that comes in several varieties, such as the green, golden and the white margined. It is known as the spindle tree and is of the easiest culture......75

PITTIOSPORUM TOBIRA. Quite different in habit from all other pittosporums, being more upright and with longer foliage. A fine town plant......75

PITTIOSPORUM UNULATUM. Probably the best known of all the pittosporums and a splendid lawn or parkway shrub. It has wavy, deep green foliage and white flowers followed by orange-yellow berries. This, with time, attains the dimensions of a medium sized tree and we strongly recommend it......75

SPARTIUM JUNCHEUM (Spanish Broom). Stiff, rush-like foliage and beautiful golden-yellow orchid-like flowers. A popular shrub and justly so, for it is one of the best......75

VERONICA. We grow immense quantities of this splendid evergreen shrub. It is of a neat habit of growth and makes a fine bush which in spring and early summer is covered with graceful blossoms of purple or wine-crimson according to the variety. We recommend this very highly......60

CUPRESSUS (CYPRESS)

C. ARIZONICA. An erect growing cypress with bluish-green foliage and pyramidal habit. Fine for wind-breaks and thriving well in dry localities......60

C. MACROCARPA (Monterey Cypress). A very hardy, quick growing cypress, handsome even in the smallest state. It will stand close clipping for hedge purposes or can be grown as a single specimen. Allowed to run up straight it makes an efficient wind-break and does well near the sea where other Conifers do not thrive......60

C. SEMPERVIRENS (Italian Cypress). Grows naturally into a thin, columnar shape and useful for Italian gardens or for planting on lawns when it is advisable to keep the view open......75

COTONEASTER. A hardy, rapid growing group of berried plants, closely resembling the Crataegus, very useful for planting close to the house. In the fall and winter they are covered with berries which combined with their drooping habit gives them a very ornamental effect. Pannosa white flowers, crimson berries. Franchetti pinkish white flowers, orange berries. Plants 2 feet tall......75

GOLDEN PRIVET. A well known plant with small variegated leaves, very showy and easy to grow. Stands trimming and useful for mixing with other shrubs......60

GERMAIN'S NEW SPENCER SWEET PEAS

Spencer Sweet Peas may be planted any time from October until Spring and frequently give best results when planted in early Fall.

MARY PICKFORD

The Sweet Pea named for Mary Pickford is one of the choicest Spencer varieties ever introduced, and is absolutely incomparable in its own artistic shade. It is a beautiful light and dainty pink with just the faintest suffusion of salmon, making a delicate color combination difficult to equal.....\$0.25

MISS CALIFORNIA

In Miss California we have a Sweet Pea novelty which compels admiration and attention wherever grown. The general effect is a rich, beautiful, salmon cream pink of a distinctly new shade. A splendid companion variety to Mary Pickford.....\$0.25
Heavenly Blue. A fine new blue of a most beautiful soft tone of Delphinium blue.....\$0.25
The President Harding. (Named by special permission of the late President of the United States.) It is an entirely new and most pleasing color in sweet peas—peach-red or salmon-cerise, suffused orange\$0.25
Powers Court. This splendid new lavender is of English origin and has received the highest awards\$0.25

GERMAIN'S COLLECTION OF SWEET PEAS OF MERIT

The five varieties listed above represent the cream of the latest Spencer creations. We offer the collection of five outstanding Spencer varieties for...\$1.00
 For winter flowering Sweet Peas and other Spencer Varieties, see page 18.

RANUNCULUS.

The value of ranunculus as a bedding plant is not sufficiently known. A large solid bed of ranunculus will lend an air of distinction to your garden which is not otherwise obtainable.

To help in establishing these more extensive plantings we offer this season our unrivaled strain in plump one year old flowering size bulbs at a price within the reach of all. Packages are put up and sold as follows:

100 bulbs	\$.25
250 bulbs	5.25
500 bulbs	10.00
